## BIX/FT1 Baby Care Model

This model is used for medical education, including obstetrics and gynecology nurses and midwives schools, and can also be used as a teaching tool for maternal and infant hygiene and infant health care.

This model can demonstrate the characteristics of a baby. The size and shape are consistent with the baby's condition and have a sense of reality. The joints of the head and upper and lower limbs can move. In clinical teaching, students can perform various operations, such as handling newborns, including dropping eye drops, sucking mucus, bathing, dressing, and changing diapers.

This model is made of soft plastic and can be washed. Size: Length: 50cm
