BIX/F21 Advanced Wearable Pregnancy Simulator

This model is suitable for adult males, unmarried females, students, pre-marital education, etc.

- The 13KG abdomen simulates a real 40-week abdomen and can also simulate different months by adjusting the fluid in the uterine cavity.
- The dressing design allows for prenatal examinations such as four-step palpation and breast care.
- It can experience the increase of fetal palace during pregnancy, causing a series of physiological states such as chest tightness, low back pain, frequent urination, etc. It can also experience the inconvenience caused by the increase of abdominal abdomen and experience the process of pregnancy.
- Warm water can be injected into the uterus to simulate amniotic fluid temperature, as well as to measure fetal height and abdominal circumference.
- It is adjustable to the best state of the human body, for fluid sampling (8-10 weeks of pregnancy) and amniocentesis (16-20 weeks of pregnancy), can be replaced.
