## **BIX-F53 Advanced gynecological comprehensive examination training model**

The model consists of a simulated pregnant woman's lower body model, fetal model, attached umbilical cord, placenta and other models. This product is aimed at basic technical training in obstetrics and provides comprehensive practice in prenatal examination, midwifery, delivery and other skills.

### **Features:**

1. The entire delivery process can be taught;
2. It can teach the fetus, umbilical cord and placenta during fetal head aspiration. The fetus has flexible joints and can demonstrate a variety of normal and abnormal fetal positions during delivery;
3. It is equipped with hand-cranked delivery mechanical components. Through manual hand-cranking, the entire delivery process such as connection, descent, flexion, internal rotation, upward extension, reset and external rotation, and fetal delivery can be realized;
4. Can practice and master comprehensive skills such as normal delivery, abnormal delivery (dystocia), midwifery techniques, and perineal protection;
5. Multiple pregnancy (twin) separation operation training Basic configuration: ·Hand-cranked delivery teaching mother body; ·2 fetuses for teaching (1 male, 1 female); ·2 placentas; ·6 umbilical cords; ·2 abdominal wall “covers”; ·1 carrying bag.
